Y5 revenue by funding route (£m)

Dilution vs runway

Revenue momentum with controlled capital intensity

The balanced route creates enough runway to scale while preserving a credible valuation/dilution story.

5-year revenue projections by funding route

Balanced route reaches
£6.83m Y5 revenue

OPTION 2 ARR PROXY

£23.50 BLENDED CAC	£17.50 Y1 ARPU	1.72 months PAYBACK	

Channel economics: low-cost community wedge, paid tests only where measured

The acquisition plan uses communities, content, browser-extension discovery and selective paid spend instead of overbuying growth too early.

List smarter. Buy safer.

Source: ListLens Financial Model v2.0 / Dossier V2.0 | Figures are modelled estimates, not actual traction.

Capital allocation designed to prove paid repeat usage before scale spend

Most of the £750k is directed into build + data + controlled GTM testing, not vanity marketing.

Illustrative value path tied to revenue scale and risk reduction

Valuation should be staged: product proof, paid beta, repeat usage, then partner/API optionality.

Y5 REVENUE

Caveat: this is an illustrative valuation framework. Final valuation requires adviser/investor negotiation and updated market evidence.

De-risking plan: what must be proven before scaling

This deck is strongest when it is explicit: financials are modelled estimates, not actual trading history.

RISK HEATMAP

Marketplace API access	Medium
Generic AI commoditisation	High
Paid conversion uncertainty	Medium
Guard wording liability	Medium
Data/comps reliability	High
Team roles not complete	Medium

TBC CAVEATS

- No live revenue or user traction assumed.
- SEIS/EIS approval must be professionally reviewed.
- Marketplace/API permissions and terms need confirmation.
- Team CVs and final company status remain to complete.

DE-RISKING SEQUENCE

- POC: prove seller + buyer utility.
- Paid beta: prove repeat usage + conversion.
- Category depth: prove Lens model via RecordLens/SoleLens.
- Scale: add extension, partner/API optionality.

Recommendation: proceed with £750k Balanced Seed as the most credible route to evidence, runway and controlled growth.
